

PREVENTION

Always Better than Cure

The risks of sports activities cannot be underestimated, the vibrations and forces caused by exercising can lead to tooth loss and even concussion. Anyone who participates in sports activities should always wear a properly fitting mouthguard to prevent injuries to teeth.

By wearing a protective sports guard, the risks of dental injuries can be prevented or the severity minimized.

MYPROFORM provides properly diagnosed, designed and custom fabricated sport guards that protect you in sports from oral to facial injuries.

The custom-made sport guards are able to absorb the force of an impact and distribute this force more evenly compared to the ready-made and mouth-formed sport guards. Therefore, the one or two teeth being impacted do not bear all the impact force.

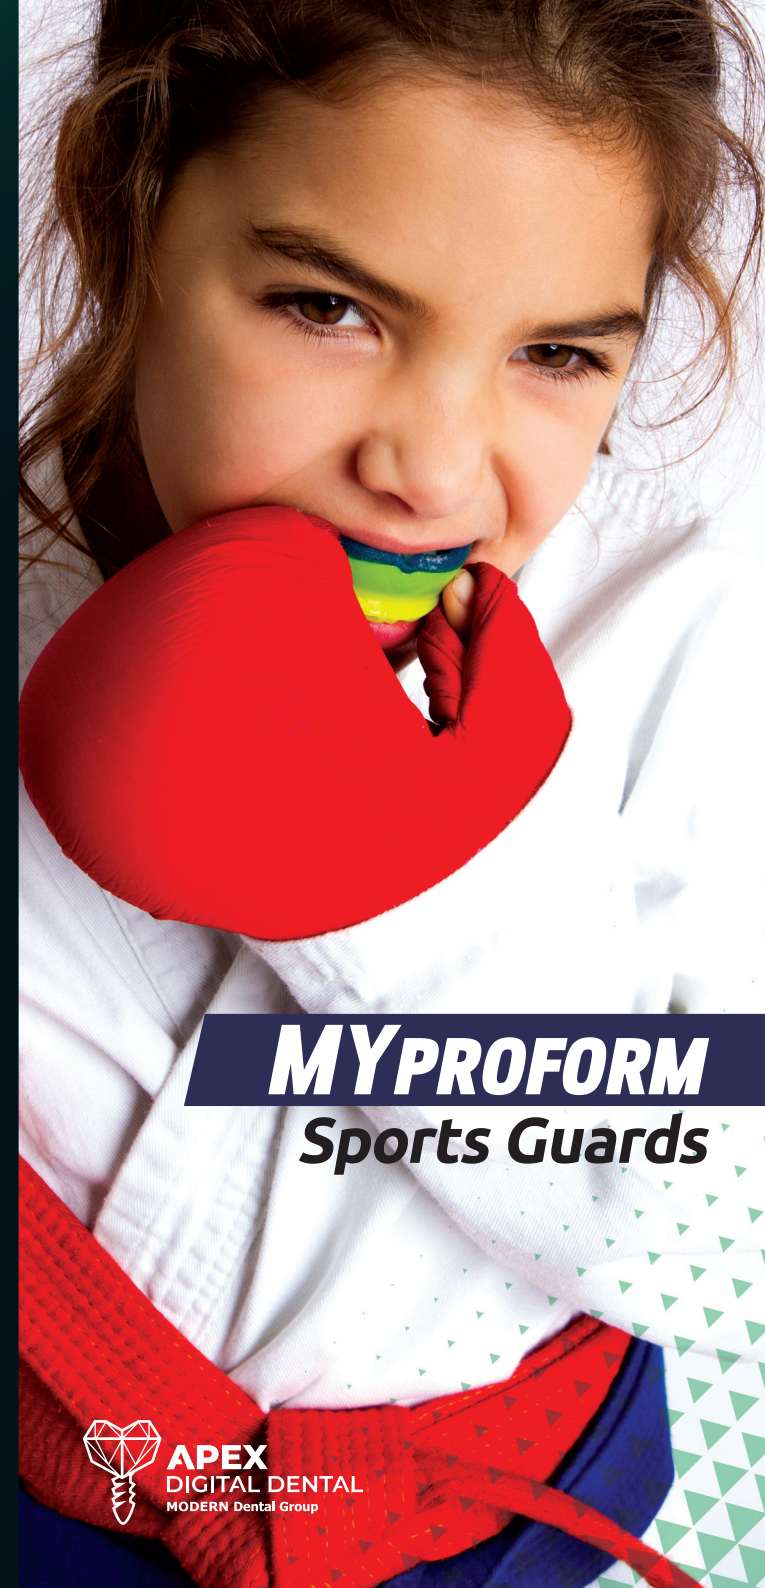

- More Comfortable
- More Durable
- Made to Fit Your Jaw
- Can Prevent Serious Injury
- Easy to Breathe & Communicate
